DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/14/2007 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Vidal 6,283,680.

Vidal discloses a powder body metering apparatus (col. 1, ll. 4-10), which comprises a metering container (18) including an inlet in an upper end, and a switch valve (120) for opening and closing the inlet of the metering container, wherein an internal capacity (19) of the metering container is variable, a first opening (138) being provided in a lower portion and a separate second opening (114) being provided in a desired portion, the first opening and the second opening each being spaced from the inlet, the first opening communicating with the second opening through the metering

container as seen in Figure 5, wherein a powder body discharge port (118B) is formed in the lower portion of the metering container, and the powder body discharge port is freely opened and closed by a closing member (116).

Response to Arguments

4. Applicants' arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Roehl 4,893,966 discloses other type of powder body metering apparatus.
